EDUCATION

Massachusetts Institute of Technology

Expected May 2027

Bachelor of Science in Computer Science and Electrical Engineering, Minor in Economics

Cambridge, MA

Relevant Coursework: Data Structures and Algorithms, C and Low-level Programming, Discrete Mathematics, Intro to Programming, Linear Algebra, Probability, Statistics, Fundamentals of Programming, Microeconomics, Macroeconomics, Computation Structures, Machine Learning, Digital Systems Lab, Circuits

Affiliations: MIT Entrepreneurship Club, MIT National Society of Black Engineers, Colorstack, MIT NEET, Management Leaders of Tomorrow

TECHNICAL SKILLS

Languages: Python, C/C++, TypeScript, JavaScript, Java, R, RISC-V Assembly, SQL (Postgres), MATLAB

Frameworks/Tools: FastAPI, Docker, Kubernetes, Google Cloud Platform, AWS, Git, MongoDB, Firebase, WebSockets

Libraries: NumPy, pandas, TensorFlow, PyTorch, Plotly, LangChain, scikit-learn, Matplotlib, Seaborn

EXPERIENCE

Massachusetts Executive Office of Technology Services and Security (EOTSS)

Jun 2025 - Aug 2025

Software Engineering Intern

Chelsea, MA

- Designed and deployed a hosting recommendation platform used by 20+ Massachusetts agencies, integrating intelligent assessment logic and cloud readiness scoring
- Constructed a modular **Flask** app with **Tailwind CSS**, intelligent scoring engine, and file-based JSON storage, planned to scale across 20+ state agencies.
- Spearheaded the development of a streamlined submission tracking system with **Flask-Mail**, leading to a 40% reduction in support requests related to submission status and improved transparency.

Jane Street IN FOCUS Fellowship

Jan 2025

Software Engineering Fellow

New York City, NY

- Developed a high performance arcade game in **OCaml**, featuring game state management and customized graphics.
- Engineered a robust trading program in Python to manage market positions and update fair prices in response to real-time market data.
- Created an arbitrage strategy to exploit price differences in equally-valued assets, achieving 40% profitability.

MIT Institute for Data, Systems and Society

Sep 2024 – Present

Undergraduate Researcher

Cambridge, MA

- Utilized **Python** and web scraping tools (e.g., **BeautifulSoup**, **Selenium**) to extract over 600,000 json records from international museum websites, creating a detailed dataset of Ottoman Empire clothing artifacts.
- Analyzed and cleaned data using **Pandas** and **NumPy**, contributing to development of cultural heritage research models.
- Currently building a real-time AI-powered web platform to host 3D museum models and retrieve visual data via LLM + Mapbox-integrated search, deployed via **Firebase**

PROJECTS

Benaki Museum Outfit Navigator | *Mapbox API, React.js, Node.js, MongoDB, Firebase, TypeScript*

Feb 2025 - Present

- Implemented an interactive map-based 3D visualization platform using Mapbox and Firebase to display more than 50,000 historical fashion artifacts; featured by the Benaki Museum for public exhibition.

Chesslab(Hackathon Finalist) | *React.js, Node.js, MongoDB, Render, HTML, CSS, JavaScript*

Jan 2024

- Programmed and launched a rules-based chess platform with move validation and game history tracking using React, achieving the top 10/37 ranking at Render Hackathon.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Management Leadership for Tomorrow

Jan 2025 – Present

Career Prep Fellow

Cambridge, MA

- Accepted into an 18 month professional development program for high-achieving diverse talent
- Completed over 50 business case studies enhancing leadership and technical skills by 60%

MIT African Students' Association

May 2024 – Present

African Learning Circle Chair

Cambridge, MA

- Facilitated student-directed discussions about developments in Africa and the role of the youth in using technology and entrepreneurship to take initiative, with distinguished guest speakers such as the former prime minister of Ivory Coast.
